# AN OPEN LETTER TO OUR MANY FRIENDS

We appreciate the many letters we receive from the many of our satisfied customers. We invite you all to visit our planting at any time. Bloom time is best, of course. The varieties are labeled plainly and easily identified. If you are a photographer, you can get a picture of a RAINBOW any time — day or nite. We suggest you use flash at nite. When you do come, inquire at the home farm for location. We make a practice to plant our glads on new land every season and use several farms in the vicinity. The most convenient location in 1955 is on Vosburg Road, near GENTS AFRICAN VIOLETS (the introducers of Pink Cheer and many others). You are assured of a real treat.

We do have an apology to offer this year. Before we had the statistical information on the bulb situation we had oversold heavily, and do not have the quantities to offer this season. Large bulbs will be definitely in short supply this season so order early, regardless from whom you may purchase. If you are in the vicinity of Rochester or Lima do try and see the Glad shows. We exhibit and would be very glad to meet you. Our display field is only 20 minutes drive from the Museum of Arts and Sciences, where the Genesee Valley sponsored glad show is held. We will be looking for you.

May you have a successful growing and showing season,  
**GLADFULLY Yours,**

*D. M. Grineff*

Large .40      Med. .30      Sm. .20

**SWEET SIXTEEN (442)** A true pink sport of Beautys Blush. Makes magnificent spikes and very beautiful. One of the best cut flower varieties we have and we plan to grow it by the million.

Large .15      Med. .10      Sm. 2 for .10

**TIVOLI (460)** A large light pink that is a top commercial on the Pacific coast. Grows very tall and we have had florets over 5 inches in spite of its 400 classification.

**TRAILS END (562)** Deep rose with a large creamy yellow throat. A huge glad that blooms early. A good commercial as well as a garden variety.

**UHU (482)** A smoky that has been likened to the marking of an owl, hence the name.

**VALERIA (550)** A good red commercial that's swell.

**QUANTITY ORDERS** are shipped collect express unless you specify otherwise. All quantity orders are sold F.O.B., Webster, N. Y. Shipments are made soon after January first as weather permits, or will be shipped on a date specified by purchaser.

**WHY ORDER EARLY:** The glad crop had been short in 1954 not only in USA but all over the world. Holland crop was almost a total failure due to bad weather. We have (perhaps unwisely) oversold on to many of our varieties and do not have the volume to offer as in previous years. BECAUSE OF THIS SITUATION, WHETHER YOU ORDER FROM US OR ANY OTHER GROWER, ORDER EARLY FOR BULBS ARE IN SHORT SUPPLY IN THE LARGE SIZES.

**ALL ORDERS WILL INCLUDE CULTURAL LEAFLET** compiled by the N. A. G. C. The information contains the whole cycle of glad culture. It is a brochure of growing experience of hundreds of experts that will make the growing of glads as easy as mowing the lawn — with a power mower! Included with every order is a GLAD BULB SCALE. We use this scale for your protection and ours. The discs blend both diameter and circumference standards. USA measurements are by diameter in inches.

**GUARANTEE:** We make every effort to keep our stock absolutely true to name and free of disease and insects. Bulbs are all treated with DDT AND SPERGON AND STATE INSPECTED AND PASSED. Mistakes do happen however in spite all we can do, at times, and will make correction to YOUR SATISFACTION. However we do not warrant in any way, expressed or implied the success of the crop. Conditions and people vary too greatly in this land of ours. If the purchaser does not accept these goods on these terms, no sale is made and goods must be returned within ten days.

**WE ARE DISTRIBUTORS OF HOLLAND, MICHIGAN and HOLLAND, EUROPE Grown Bulbs. TULIPS, HYACINTHS, NARCISSUS et al.** A list will be sent to you on request at the proper time. Look for our ad in *Flower Grower*, *Popular Gardening*, *Horticulture* and many other garden periodicals.
